		Numbness and tingling
		Pain
		Sexual changes
		Weight gain

## COMPREHENSIVE CANCER CARE

AT

## KAISER PERMANENTE SANTA CLARA

<http://kp.org/santaclara/cancercare>

## How to use this website

Start with the [Find information by diagnosis](#) tab on the left sidebar menu, where you can find overviews about the most common cancers, how they are diagnosed and treated, with details about the services offered by our center. The right sidebar provides links to additional information.

Alternatively, [Services we provide](#) introduces the services and departments you may need such as surgery, radiation therapy, chemotherapy, nutrition, physical therapy, social services, etc.

[More about cancer and side effects](#) provides additional information about cancers, treatment side effects, and ways to cope with the side effects. Also included are information about alternative supplements, cancer prevention tips, and links to other informative cancer websites and resources.

At any given time we have more than thirty [Clinical trials](#) open for our cancer patients. Further information about these trials can be found here.

[Cancer support services](#) provides medical, financial, spiritual, and physical support information. Also included are selected non-Kaiser Permanente related support information that may be helpful to you.

After completing treatment, [Cancer survivorship](#) provides ways to reduce risk of recurrence, managing long term side effects, emotional, social, legal and financial support information as well as follow-up guidance and more.

[How to find us](#) includes a detailed map of the medical center itself and a listing of department hours, location, and other pertinent information. On the right sidebar, there are links to the other Kaiser Permanente locations within the South Bay region.
